

COMPANY OVERVIEW

Craters & Freighters has over three decades of experience in engineering custom packaging and crates for the government. Our engineers draw from many sources to design the best crating solutions for your product or unique item(s). These sources include an extensive ASTM library, SolidWorks, and crating & cushioning software. The crate building materials are determined based on the item's characteristics as applied to density, shock value, drop, vibration, and recovery.

Call Craters & Freighters today for complete packaging and crating solutions and a comprehensive quote.

SBA SMALL BUSINESS

The SBA classifies Craters & Freighters as a small business.
